

# PVAmicro

Super absorbent-Streak-free cleaning cloth

## Best results with our most successful microfibre cloth

Vileda Professional uses latest technologies to invent and produce more efficient cleaning solutions to reduce your work. Our most successful microfibre cloth PVAmicro achieves streak-free cleaning results with only one-step through a unique coating technology. The patented PVAmicro cloth absorbs a high amount of water as well as other liquids and release them homogenously.

The smooth surface structure of PVAmicro makes sure releasing dirt particles easily. Work with the best all-purpose microfibre cloth and achieve your highest performance. Cleaning was never easier. Buy your PVAmicro now!

## High work efficiency with the PVAmicro cleaning cloth

PVAmicro is ideal for all types of hard surfaces, such as office furniture, glasses or stainless steel and it is also able to keep up its high-performance level over a long period of time. The PVAmicro holds 40 times less particle residues after rinsing compared to ordinary knitted microfibre cloths. The unique coating technology provides maximum absorbency in combination with streak-free results and especially fits demands regarding time-efficient cleaning of large surfaces.

When put in water, the wipe becomes very soft and flexible. This allows you to clean delicate surfaces like mirror or stainless steel. The PVAmicro has a soft touch and high absorbency. The wipe removes fatty dirt efficiently for brilliant results and is ideal for the bucket-method.

Use the PVAmicro cleaning cloth for any hard surface and save time with its efficient cleaning characteristics. Its resilience will also reduce your costs as it lasts for a very long time. Just wash it thoroughly after using and it will serve you for a long period.
