About Sustainability

“Making our economy sustainable is not a coincidence, but the direct result of actions we take – as companies and consumers. We can be proud of our achievements to date. Our durable products help save waste, while delivering excellent product performance. In recent years we continuously increased the use of recycled plastics in our solid plastic products from 15 to over 40 percent. Nearly all our plastic packaging is recyclable. But we have a responsibility to continuously improve and make a difference where we can. That is why we founded our corporate initiative 'Love It Clean', which embodies our core belief that we have a responsibility for future generations. For the upcoming years we are dedicated to achieving ambitious goals, and we are a signatory of the Ellen MacArthur Foundation's New Plastics Economy Global Commitment. Because we believe that in sustainability less is more, we want to continue reducing waste, fostering sustainable packaging, designing out virgin plastic and focus on what we do best: Creating high quality products that last.”

KARIN OVERBECK

CEO of Freudenberg Home and Cleaning Solutions GmbH (FHCS)

'Love it Clean' is our contribution to making not only homes a cleaner place – but also the environment.

Addressing industrial and consumer waste is one of the most important environmental issues. Our oceans, agriculture and quality of life ultimately depend on how businesses and consumers address the human impact on the earth. Waste in the environment is a global issue that requires action. As a manufacturer of world-renowned cleaning brands, we have a responsibility to preserve our planet for future generations.

We will continue to make the Earth a cleaner place by reducing our environmental footprint. All along the life cycle of our products - from raw material sourcing to disposal - we consider environmental criteria as key measures for the future success of our company - while always striving to improve our excellent product performance.

We focus on three main areas where we believe we can make the biggest difference – by creating products that last, by giving materials a second life and designing out waste.

OriGO GREENER

OriGO FLEXIBLE

The new Origo 2

Today, trolley systems are expected to do more than carry cleaning products and tools. Origo 2 rises to meet this challenge with new innovative features and seamless digital integration – all designed to offer you greater safety and connectivity, improved hygiene and higher Eff.Hyg.Env. In short: perfect, validated cleaning results.

OriGO FURTHER

Efficiency

Intuitive, faster cleaning

- ✓ Satellite trolleys: waste, pre-prepared or bucket & press
- ✓ New mop and storage boxes, compatible with all pre-prepared mops and equipment
- ✓ Divider allows dosing of a full or half box of mops to save chemicals and laundry
- ✓ Vertical tool storage for up to four mops of any width (25 cm to 75 cm)

Hygiene

Cleaner operational and process management

- ✓ Hands-free lid opening for safe, clean operation
- ✓ Clearly defined sections keep waste well away from clean and used materials
- ✓ Protective lids on all buckets, boxes and trays keep contents clean
- ✓ Full colour coding of all elements
- ✓ Optionally split waste and used materials into 1, 2 or 3 sections

Security

Innovative design increases safety and peace of mind

- ✓ Secure your cleaning products and protect your clients' premises
- ✓ Lockable doors and top lids prevent unauthorised access to contents
- ✓ Hidden safety compartment for employees' personal items
- ✓ Soft-touch bumpers: no scuff marks and less damage to walls
- ✓ Foldable waste/used extension: even easier to store after use

Connectivity

Seamless integration of cleaning tools and digitally connected devices

- ✔ World's first trolley featuring an in-lid tablet holder
- ✔ See and respond to push notifications directly, without opening or lifting the lid
- ✔ Compatible with any tablet and workforce management software
- ✔ Secure, fully lockable tablet storage to prevent theft

Sustainability

Available only
on demand

Taking responsibility for our environment

- ✔ Bucket and box range made from 50 % recycled plastic meets international guidelines
- ✔ All elements of the trolley suitable for post-use recycling
- ✔ Recycled bucket and box range are black making them easy to identify
- ✔ Innovative logistics reduce CO₂ emissions from transportation

Customisation

Because every space, task and employee is unique

- ✔ All buckets, boxes and trays can be positioned anywhere
- ✔ Smart, integrated rail system with multiple height options for storage
- ✔ Three different trolley types, each configurable to your specific requirements
- ✔ Compatible with all pre-prepared, bucket & press and waste systems

Origo

Two Different Configurations

The Origo FX convertible into an HX are all built around the same idea of long-life performance. The trolley you start with depends entirely on your requirements. The Origo FX is the entry model with a basic fixed configuration. The Origo 300 HX is the configurable alternative to the FX.

Origo Carts

Origo 300FX Complete Cleaning Cart

The Origo 300FX is a trolley designed for general use in all cleaning environments. It comes complete with a waste collection and storage area for all your cleaning utensils – Suitable for the Swebp, UltraSpeed, Pocket and Velcro systems

Includes

- Plastic Bin bag holder with support bars
- 120 L grey bag with zipper
- Two (2) full trays and
- Two (2) 6 L buckets with lids
- 4 – 5 inch/127mm in swivel casters
- Frame holder set (for Origo 300)

Downpress Wringers - CONTRACTORS CHOICE

- The Downpress wringer is injection molded with high density polymer and features a strong durable smooth surface that is easy to clean and sanitize.
- Unlike foam plastic wringers, our wringer does not provide a breeding ground for bacteria.
- Gears and pressure plates are fiber reinforced nylon which allows for quiet and smooth operation.
- Eliminate the need to stock various sized wringers. The wringer is designed to effectively wring all wet mops from 340 g to 900 g / 12 oz to 32 oz.

SpillEX - Super Absorbent, Super Safe

- SpillEx takes care of the problem
- SpillEx is a disposable super-absorbing floor cloth that takes care of liquid spillages in minutes. One SpillEx absorbs and holds up to 1.2 L of water and up to 500ml of body fluids (urine) and it will not drip when lifting and moving, as SpillEx transforms the liquid spill into a gel.
- SpillEx is the ideal problem solver where you need to absorb liquid spillages, before the actual floor cleaning takes places. No risk of cross-contamination and no risk of soiling the bucket water with the spillage.

Weight per cloth	45 g
Size	51 x 37 cm / 21 x 14.5 in

Understanding Fibers

Horsehair

Horsehair is a natural fiber that comes from the tail or mane of a horse. The fiber is considered a soft to moderately stiff material that offers good texture and resilience. Horsehair withstands water and moisture and may be used pure or blended with other materials. The soft texture of the fiber makes it ideal for cleaning smooth floors. It is commonly used for scratchless cleaning of highly polished areas.

Ideal For: Indoor Applications, Fine Dust Cleaning, Smooth Surface.

Polystyrene

Polystyrene is a synthetic fiber that is also known as "silver flagged". The fiber withstands moisture and has excellent wearing properties. When the ends are flagged, the styrene allows for more fine dust retention. Ideal for smooth surfaces and hardwood floors.

Ideal For: Usage with many strong solvents.

Can be used in temperatures of up to 180° F / 82° C

Tampico

Tampico is a natural fiber that is creamy white in colour, however, the fibers are dyed black. Tampico has a soft to medium texture with excellent durability. The fiber is water resistant with high heat, acid and alkaline resistant properties. Tampico is frequently mixed or blended with other materials to vary texture and properties. It is a good wearing and highly versatile fiber. Ideal for "all purpose" or medium sweeping.

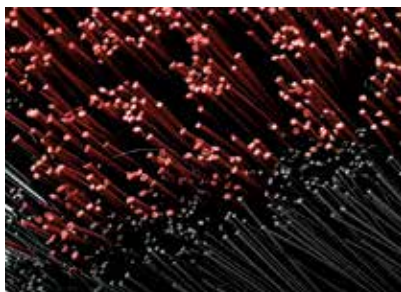

Ideal For: Wet or Dry Applications. Acid and alkaline resistant.

Nylon

Nylon is a synthetic fiber with excellent wearing qualities. Nylon is water resistant and won't absorb moisture, therefore discourages bacterial growth. Its high heat resistance and resistance to most acids enable the fiber to be long wearing and highly sanitary. Nylon is widely used in food service brushes due to its resilience and durability. It offers the highest quality and superior performance one requires in environments with high sanitary standards.

Ideal For: Foodservice applications to meet the needs of high sanitary standards.

Polypropylene

Polypropylene is a synthetic fiber available straight or crimped in a variety of colours. The fiber is very light with excellent resilience to acid and most solvents. Polypropylene has poor recovery from crushing, however, it can be used in hot water and has good wearing properties.

Ideal For: Usage with many strong solvents/acid and abrasive scrubbing.

Bassine

Bassine is a natural fiber that is obtained from the select and stiffer portions of the palmyra palm. It is the superior quality or the select grade of palmyra fiber. Bassine is both durable and water resistant, which makes it an ideal choice for stiff scrubbing applications.

Ideal For: Outdoor usage where stiff scrubbing is required (wet and dry).

Flip-Cap- New reduce wrist strength and spraying

- Flip cap is more ergonomic for a cleaner than the repetitive hand motion of a sprayer. Flip cap is a new cleaning trend for safety and regulatory conditions. As spraying is practical, the new flip cap allows you to control the liquids you pour.
- The pain in your carpal tunnel is due to excess pressure in your wrist and on the median nerve. With Flip-cap you will reduce the strength in wrist.
